

22:02:11 開始 MENGU CHO : If you have a question, please type in Chat message.
22:13:55 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) : any protection circuite of over charge?
22:14:41 開始 MENGU CHO : What was the main reason to switch to LiIon?
22:17:30 開始 MENGU CHO : It is a commercial battery, EneLoop. You can buy anywhere in consumer shop.
22:19:58 開始 Hari Ram SHRESTHA kyutech : what is a battery configuration! I think it should be 2 battery in parallel! Am I right professor?
22:27:19 開始 Femi ISHOLA (NICT) : Are the school students/teachers engaged in the satellite development?
22:31:31 開始 MENGU CHO : Did you have any difficulty of convincing IARU for the use of amateur band?
22:34:17 開始 Femi ISHOLA (NICT) : Aside the battery issue, is there any major modification you had to make to the BIRDS Bus?
22:39:38 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) : any internship? my students are looking for new space company.
22:40:33 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) : answer to my question is okay in chat.
22:45:20 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) : thank you very much
22:45:20 開始 Azami : How old are the students in average?
22:45:35 開始 Marloun Sejera : From what I understood, students are involved in payload development. How about in the bus system development and system integration?
22:46:19 開始 Yoji Hirakata : Do they use their (school's) own ground station for donwlink of telemetry/mission/CW beacon ? Or third party's one?
22:47:55 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) : For internship, I read arcedge twitter developing USB in space. very interesting.
22:53:37 開始 MENGU CHO : Which company did you use to make PCB? P. 板?
22:58:12 開始 Masanobu Tsuji : Engineers at ArkEdge space are young and they have experience of 3 - 10 years, I think.
22:59:14 開始 Masanobu Tsuji : Thank you for reading ArkEdge's twitter.
23:00:36 開始 Masanobu Tsuji : <https://mobile.twitter.com/arkedgespace>
23:01:53 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) : I want by this board
23:02:18 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) : i would like to buy this FAB board.
23:02:41 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) : FAB interface board
23:03:02 開始 MENGU CHO : FAB interface board is a good idea.

[chat.txt]

23:03:33 開始 MENGU CHO : This RAB interface board is also good.
23:08:50 開始 Masanobu Tsuji : This debugging interface is interesting!
23:09:11 開始 Masanobu Tsuji : Nakazawa-san is working at home with
this
tool.
23:09:35 開始 Masanobu Tsuji : The OBC is at office and he works at
home..
23:10:58 開始 Masanobu Tsuji : Analog Discovery 2 is available at
AKIDUKI
denshi
23:11:08 開始 Tetsuro Harada (Kyutech/Chiba Institute of Technology) :
any trouble for debugging in COMPIC and RESETPIC because uart is shared. did
you use debugger in
MPLABX?
23:12:50 開始 Masanobu Tsuji : The first part of Digitalker, it talks
"This is Clark
sat-1..."
23:14:23 開始 Azami : How much is the GSD of camera mission? are you
using the default lens from the manufacturer? and I think BIRDS-1 to 4 are
using Arducam 5MP, if I am not mistaken. So Clark sat-1 is using Arducam 2MP
similar with KITSUNE small
camera
23:18:33 開始 Azami : Great, thank you Nakazawa-san!
23:18:55 開始 Masanobu Tsuji : Tetsuro Harada (Kyutech/Chiba Institute
of Technology) から全員に 10:13
PM
any protection circuite of over charge?
MENGU CHO から全員に 10:17 PM
What was the main reason to switch to LiIon?
It is a commercial battery, EneLoop. You can buy anywhere in consumer shop.
Hari Ram SHRESTHA kyutech から全員に 10:20 PM
what is a battery configuration! I think it should be 2 battery in parallel! Am I
right
professor?
23:23:25 開始 Pooja Lepcha : What was the change in the DC/DC converter?
23:24:22 開始 Pooja Lepcha : thank you
